

## Step 1: Open

<https://console.cloud.google.com/google/maps-apis/overview>

## Step 2: Select the project if you already have it or create a new project.

**Project name \***  
Test

Project ID: esoteric-throne-264505. It cannot be changed later. [EDIT](#)

**Billing account \***  
My Billing Account

Any charges for this project will be billed to the account you select here.

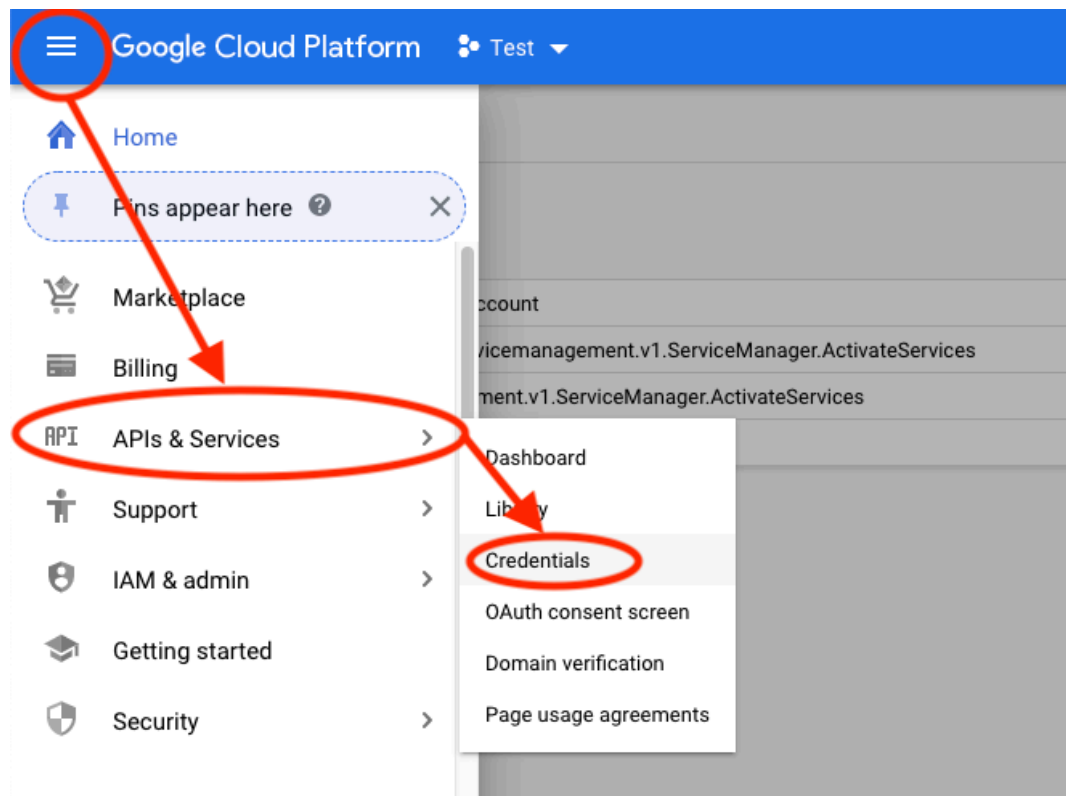

**Location \***  
No organization [BROWSE](#)

Parent organization or folder

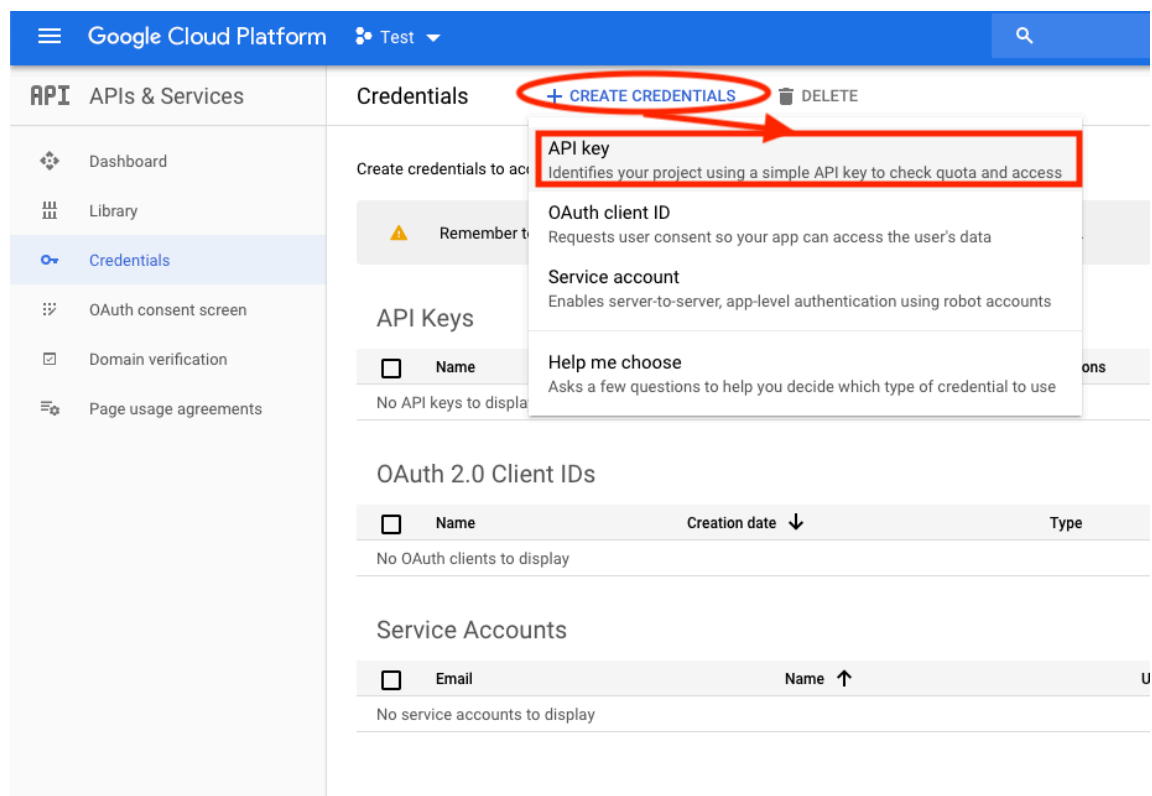

[CREATE](#) [CANCEL](#)

You will have to setup a Billing account if you do not have it. Then click on Create.

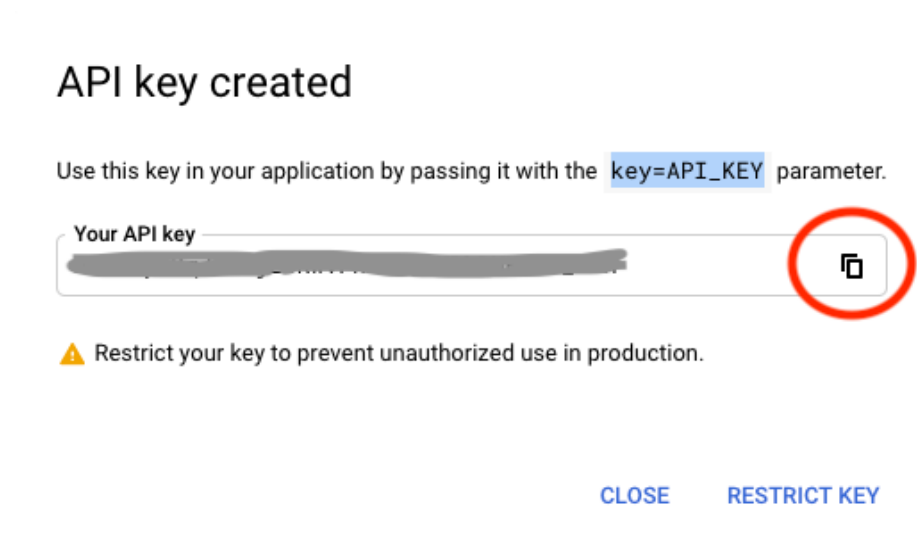

Step3 : Click on Menu Icon -> API & Services -> Credentials

Step 4: Click on “Create Credential”

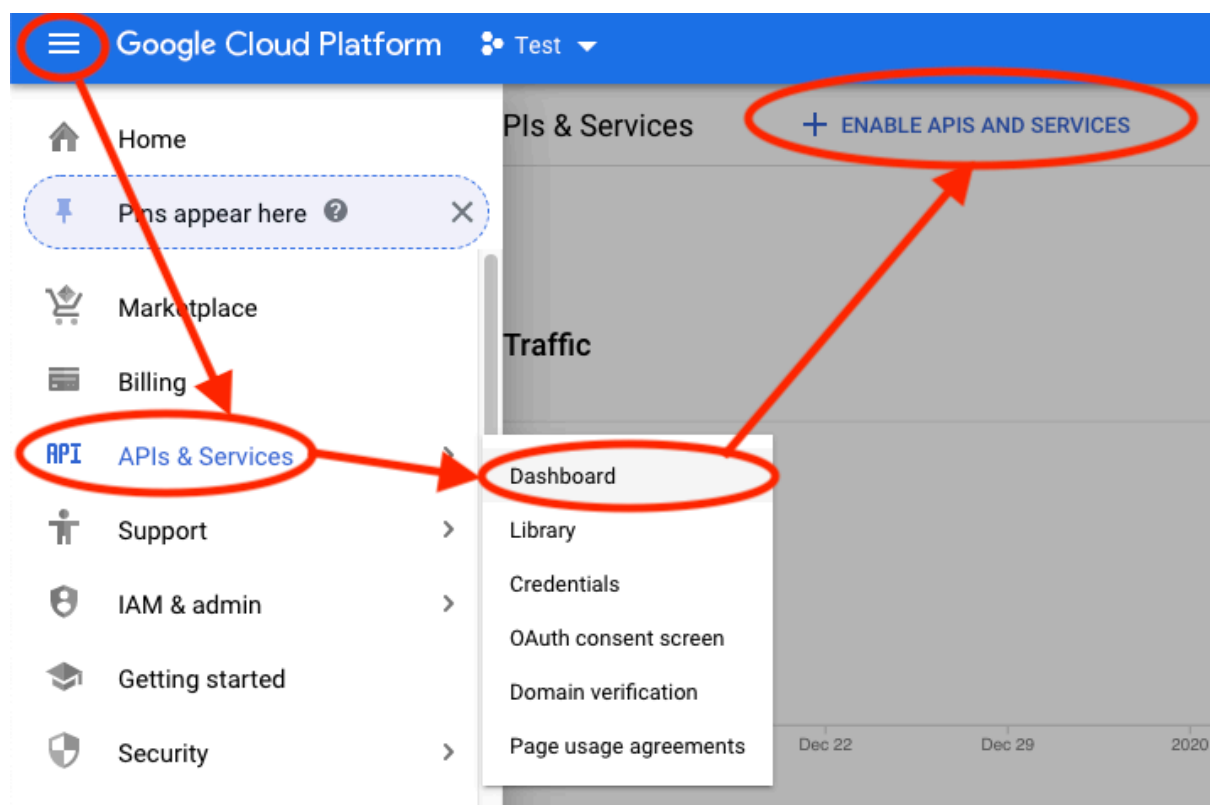

Step 5: Click on "Create Credential"

Copy the API key. This will be used in code.

Step 6: Couple of more steps required from some extra permissions. Click on API & Services -> Dashboard -> Enable APIs and Services

## Step 7: Enable All the APIs show below. Very Important

Distance Matrix API

Geocoding API

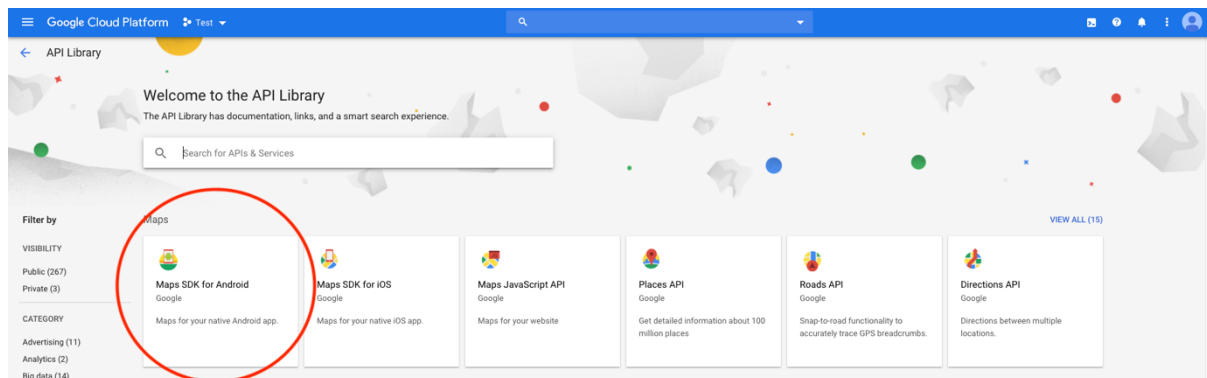

Direction API

Places API

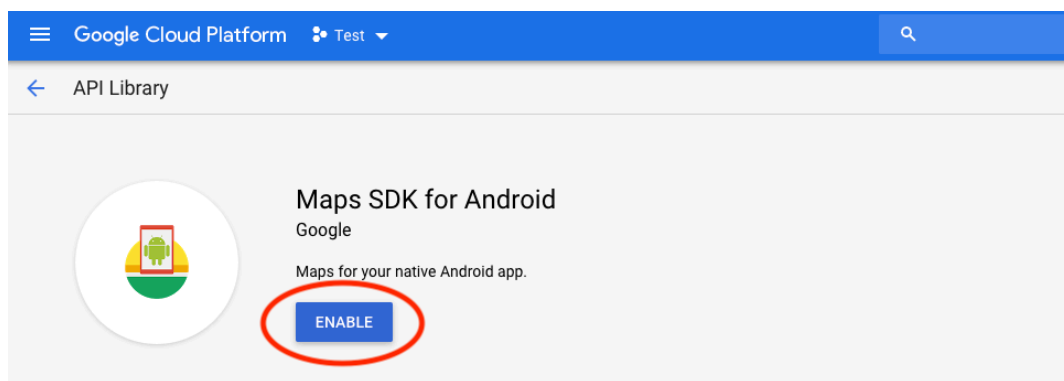

Map JavaScript API

MAP API for IOS

MAP API for Android

Step8 : This is how you enable each API.

**Type**  
APIs & services

**Category**  
Maps

**Service name**  
maps-android-backend.googleapis.com

**Overview**

Add maps based on Google Maps data to your Android application with the Maps SDK for Android. The SDK automatically handles access to Google Maps servers, map display and response to user gestures such as clicks and drags.

**About Google**

Google's mission is to organize the world's information and make it universally accessible and useful. Through products and platforms like Search, Maps, Gmail, Android, Google Play, Chrome and YouTube, Google plays a meaningful role in the daily lives of billions of people.

**Note: Enable billing in this Google Cloud Platform. Very important.**
